Giraffes Can’t Dance

Who says that giraffes can’t dance? Mrs Hercock’s class found out that they certainly can, however the main character in this story had some trouble getting started. He was rather gangly and uncoordinated to begin with, and suffered some taunting from the other animals. But as the story developed, he found a friend who taught him that he just had to find the right music to suit his style, and he was away. Some great life lessons in this simple story!

Following the story and some great discussion, the students created some fun artwork to show their giraffe dancing. The colourful backgrounds were painted during a lesson on making light and dark tones by adding white or black to a base colour.
