

# OUR SUN AND MOON ARTWORKS

We have learnt about the Sun and Moon in Science so we thought we would make some artwork as well. We used paper plates to draw around for the Sun and the Moon. Then some of us drew pencil lines straight across the page and drew the nose. We then rubbed out the pencil lines. Next we drew eyes on our pictures and finally we added some decoration. We coloured in the pictures using brightly coloured dyes and then we glued them to black backing paper.
