

Painting with SNAILS!

YES!! You read that right;

Kindy 2 had fun painting with snails.

We have been investigating lines and were learning all about spirals. What better way to see a spiral up close than to observe snails in action.

We very gently held our slimy, wet snail friends or just placed them on paper if we did not want to touch them. As snails love water, we put a little blob of coloured edicol on our paper and watched in awe as our slimy friends slithered all over the paper making their own creative pattern.

Our snails were so clever, they even mixed colours to make NEW colours! Have a look at the artwork from our wonderful snails:

We LOVE snails!!
