A Whole School Perspective on Caring.

Caring for self and others through a focus on Values.

Promoting great values is a big part of our focus at EMPS, as it helps to establish lifelong qualities.

Caring for our environment - 'Reduce, Reuse and Recycle'

Since becoming a Waste Wise school and putting in place our recycling programs we have reduced the amount of waste that we send to landfill by 50%.

Caring for our student’s physical, emotional and social well-being through Nature Play.

East Manjimup Primary has been at the forefront of the Nature Play movement in the South-West. Our natural play area is also featured as an exemplar on the ‘Nature Play’ website. With 7 hectares of school land, this has allowed us to create an innovative and challenging nature play area for our students.

Caring for student success and achievement.

Whether it is academic or sporting successes we celebrate the small and the big achievements with all of our students.
