

Our Senses

We have started to investigate our 5 senses of touch, taste, hearing, smell and sight.

We started with our sense of touch.

We have had lots of fun finding out how things felt, using descriptive words such as "bumpy, smooth, hard, soft, squishy, wet, rough, and prickly."

We made pictures by gluing tactile items onto some paper.

We also had fun using our hands to play with shaving cream. It felt cold, wet and VERY slimy....our hands smelt so lovely afterwards!

To finish our exploration of touch, we went on a tactile obstacle course. We had to walk on items with our bare feet to see how they felt. We had to walk on items such as:

A prickly door mat

Bumpy, corrugated cardboard

Squishy foam

A fluffy floor mat and bubble wrap

Bumpy corn kernels

Soft socks and a scarf

A walk through the sand pit and cold water

Smooth rocks.

We enjoyed finding out about our sense of touch and can't wait to explore our sense of taste next!
