

# First Aid Fever

EMPS July 25<sup>th</sup> 2017

Written By Abby Scanlon

WEE WOO WEE WOO, HERE COMES THE AMBULANCE!! Was it an emergency?  
Is someone hurt? NO! EVEN BETTER!

On the 25<sup>th</sup> July 2017, we had an ambulance come to our school (EMPS) and teach us First Aid. We learnt what to do when someone is unconscious, how to do a sling for a broken arm and it was VERY fun! This is what we did when someone was unconscious:

Check for danger. Yell at them to see if they respond and if not, pinch a certain muscle in their shoulder. Check if they are breathing. See if there is anything in their mouth so they can't choke on it. Put their arm that is away from you straight like a line and then put their leg that is close to you up. Then the arm that is close to you around their neck and then flip them away from you so they can't puke on you. Make sure they are still breathing and then call 000 for help.

Here is what some people thought about it:

**(Jessica P)** I thought it was fun and interesting.

**(Rahni)** It was fun, I guess. People kept tickling me. 😊

**(Jack)** It was enjoyable.

**(Jessica G)** It was interesting to learn First Aid.

**(Lorelei)** It was AWESOME and fun!

Special thanks to the ladies that helped us learn First Aid.  
THANK YOU!!

What do you call a baby ambulance?

WAAAbulance!!
